

DARSHIT KUMAR

SEO / GEO Growth Marketer

Kota, Rajasthan, India | (+91) 8924928363 | darshit23k@gmail.com

Portfolio / Case Studies: github.com/DarshitKumar8 | LinkedIn: linkedin.com/in/darshitkumar

PROFILE

SEO/GEO growth marketer specializing in AI-first search visibility, competitive benchmarking, and data-driven growth systems. Built structured GEO evaluation frameworks analyzing 69 AI-generated responses across ChatGPT and Gemini, and executed end-to-end GTM programs — positioning, funnel design, CRO, analytics — for early-stage products. Fluent in GA4, SQL, Power BI, and Python-based analysis, translating raw search and funnel data into prioritized, business-ready recommendations for product, content, and growth teams.

CORE SKILLS

SEO & GEO Strategy: Technical SEO audits, keyword research & topical clustering, competitive/keyword-gap analysis, GEO & AI-search visibility benchmarking (ChatGPT, Gemini), citation & ranking analysis, structured data

Data & Analytics: GA4, SQL, MySQL, Power BI, Excel/Google Sheets, A/B testing, KPI dashboarding

Growth & GTM Execution: Funnel design, landing-page CRO, email nurture & marketing automation, positioning & pricing/packaging, multi-channel outreach (LinkedIn, X, email)

Technical & AI Augmentation: Python for data analysis, prompt-based AI evaluation frameworks, Figma prototyping, Git/GitHub

EXPERIENCE

Geonius AI — SEO / GEO Intern

Oct 2025 – Jan 2026

- Investigated how generative AI platforms (ChatGPT, Gemini) surface, rank, and cite content, developing a structured methodology for evaluating brand visibility and citation behavior in AI-first search — later formalized into the independent GEO research projects below.
- Ran competitor and feature-gap analysis across the productivity-software landscape to surface positioning and differentiation opportunities for product and content teams.
- Synthesized research into internal documentation used to guide content strategy and search-visibility priorities.

V4Labs — Marketing Lead

Aug 2025 – Oct 2025

- Built the go-to-market playbook — positioning, landing-page funnel, lead magnet, and pricing/packaging — for a post-MVP product with no prior GTM infrastructure, then launched multi-channel content and outreach (LinkedIn, X, blog, email) to generate inbound pipeline from founders and SMEs.
- Designed a full lead funnel — gated lead magnet → automated email nurture → CRM tracking — and instrumented GA4, UTM tracking, and A/B testing across it to diagnose conversion leaks and improve lead quality for handoff to sales.

PROJECTS

GEO Case Study: Evaluating Notion's Visibility in ChatGPT

Jun 2026

- Designed a structured GEO evaluation framework using 29 prompts across 4 search-intent categories (Brand, Use-Case, Comparison, Buying-Intent) to benchmark Notion's visibility, ranking behavior, citations, and recommendation patterns in ChatGPT.
- Analyzed 55.17% mention rate, 37.93% citation rate, 41.38% top-position rate, 48.28% top-3 visibility, and 1.69 average rank, building KPI dashboards and visualizations in Google Sheets to quantify AI search performance.
- Evaluated 40+ competing productivity platforms, identifying Microsoft OneNote (9), Obsidian (8), and ClickUp (8) as the most frequently surfaced alternatives, and synthesized findings into a research report with data-driven GEO recommendations.

SEO Audit Competitive Analysis of Zapier

Jun 2026

- Conducted a comprehensive SEO audit of 5 representative website pages (Homepage, Pricing, AI, Integration, and Blog), evaluating 14+ technical SEO dimensions including metadata, canonical tags, structured data, internal linking, crawlability, mobile optimization, and image accessibility to identify optimization opportunities.
- Developed a keyword research framework comprising 32 prioritized keywords organized into 7 topical clusters, then benchmarked Zapier against 5 competitors through competitive and keyword gap analyses to identify high-impact content and positioning opportunities.
- Built an end-to-end SEO audit deliverable consisting of 12 structured analysis dashboards/tabs, a professional audit report, and an executive presentation, synthesizing technical findings, backlink assessment (DR 91, 95K referring domains, 10M backlinks), and a prioritized 90-day SEO roadmap for decision-making.

AI Search Platform Benchmark: Comparative Analysis of ChatGPT and Gemini

Jul 2026

- Designed a structured AI search benchmarking framework using 20 prompts across 5 search intent categories, evaluating 2 AI platforms with a custom rubric measuring Accuracy, Completeness, and Actionability to compare AI search performance and recommendation quality.
- Built a reproducible GEO research dataset comprising 40 AI responses, analyzed citation behavior, recommendation frequency, and prompt-level winners, and automated comparative metrics and visualizations using Google Sheets for repeatable AI search evaluation.
- Synthesized benchmark findings into a professional research report and presentation, identifying that Gemini outperformed ChatGPT in Overall Score (4.91 vs. 4.63), Completeness (4.95 vs. 4.40), and Citation Rate (85% vs. 10%), while both platforms achieved 5.0 Accuracy and 55% Recommendation Rate, providing actionable insights for AI Search and GEO strategy.

EDUCATION

Indian Institute of Information Technology, Kota

2022 – 2026

Bachelor of Technology — Kota, Rajasthan
