

AI Search Platform Benchmark

A Comparative Analysis of ChatGPT and
Gemini

Author: Darshit Kumar
GEO Research Project

Objective

Compare ChatGPT and Gemini using 20 AI search prompts.

Evaluate Accuracy, Completeness and Actionability.

Analyze citation behaviour and recommendations.

Methodology

Platforms: ChatGPT, Gemini

20 identical prompts across 5 categories

Incognito testing, no follow-up prompts

Overall Score = Average(Accuracy, Completeness, Actionability)

Overall Results

Overall Score: ChatGPT 4.63 |
Gemini 4.91

Accuracy: 5.00 | 5.00

Completeness: 4.40 | 4.95

Actionability: 4.50 | 4.75

Citation Rate: 10% | 85%

ChatGPT

Strengths: Concise, readable,
actionable

Weakness: Limited citation usage

Gemini

Strengths: Comprehensive, well-cited,
detailed

Weakness: Longer responses

Key Findings

Gemini outperformed ChatGPT overall.
Both models were highly accurate.
Gemini cited sources much more frequently.
Recommendation frequency was identical.

Conclusion

Gemini is stronger for research-oriented tasks.
ChatGPT excels for quick practical answers.
GEO should focus on authoritative, comprehensive content.
